PROFESSIONAL EXPERIENCE

Software Engineer

28 East Pty Ltd

 01/2025 – 10/2025  Centurion, Pretoria

- Developed network coverage map solutions using React and Google Maps Platform
- Implemented HTTP/REST (and gRPC) APIs in GoLang, including pagination, error handling, authentication/authorisation, and versioning
- Managed performance optimisation, observability, and troubleshooting within the Google Cloud Platform
- Experience designing and building event-driven systems (i.e. message brokers, streams)
- Supported continuous integration, delivery, and deployment to ensure a smooth and stable development pipeline
- Built conversational AI chatbots using Google Dialogflow, integrating natural language understanding into customer-facing workflows
- Integrated Dialogflow agents with Google Maps Platform to deliver location-aware, AI-driven user experiences

Software Developer / Data Analyst

Digital Solutions Foundry

 08/2022 – 03/2024  Johannesburg

- Developed comprehensive IFRS-17 compliant actuarial and financial processing systems that automate insurance contract measurement, risk assessment, and regulatory reporting.
- Built interactive dashboards showing policy persistency rates, premium collection efficiency, and policy renewal patterns
- Provided transparent audit trails for regulatory compliance and external reporting requirements use
- Developed backend services using .NET Core and responsive frontends using Vue.js
- Built variance analysis tools that explain period-over-period changes in insurance contract values across experience adjustments, assumption changes, and new business for Hollard Insurance across Southern Africa

Financial Administrator

Africa Centre of Evidence

 02/2019 – 06/2022  Johannesburg

- Facilitating the administrative procedures that sustain the research center on day-to-day basis internal auditing of other entity divisions and substantiating their financial information monthly.
- Provide for the proper evaluation, control, documentation and benefit tracking of special projects.
